PERSONAL BRIEF

Dear Sir & Madam,

As a graduate from Bosphorus Uni. Software Programming & Melbourne Universities Grad.Dip of Computing Science degrees I got scholarship from “Data Effectively Analysis” shared project run by Melbourne, Oxford & MIT universities.

I started work in YapıKredi Bank’s subsidiary Bilpa Information Center as a programmer in Credit Card system support team. Later when I moved to Melbourne I formed & lead my business OCONS IT Consultancy Services as a partnership.

In 1994, I was accepted **Australian Computer Society (ACS)** as an **Associate Member**. In 1997 my field experiences accepted by ACS and I become a **Member of ACS** having wide range of experiences in **Australian Post, Australian National Rail, Australian National Bank, Telstra-(Australia Telecom), Mortgage Alliance International (MAI)** projects; in projects of **IBM, DMR, KPMG** which are international consultancy services. I had **Project Manager & System Architect experiences** in various **Management Information Systems, Restructuring projects, Strategic & Business Development Planning projects**.

Because of my wide range of experiences in projects I became expert in **Rapid Application Development (RAD) Methodology** for “**critical prototyping of business requirements**” projects which require wide range of experience, high level of business requirement analysis & design, as well as quick prototyping and modeling skills.

Since I returned to Türkiye in late 2002, I formed my consultancy business, OCONS I.T. Consultancy Services in Adana developing various web-based software for Corporates, SME businesses as well as providing various consultancy services in quality management.

I also participated in EU & UNDP projects providing consultancy in IT, project planning & management.

Because of these experiences I possessed, I believe I will be most useful to you, to your project from start to end covering all business aspects.

Kind Regards
